

Driving risk and cost mitigation for organisations. Together.

Chubb and International SOS serve over 1,000 mutual clients with global travel risk exposure.

Together, we have effectively prevented, responded to and paid claims in thousands of situations.

The combined strength of two industry-leading organisations offer the best value to clients who know the importance of investing in comprehensive and consistent travel risk management and benefits programmes.

Investing in those programmes ensures organisations the right protection to all their employees worldwide and supports their Duty of Care responsibilities.

Chubb and International SOS collaborated to produce another study on joint clients over a four-year period to explore how clients benefitted from our joint solutions¹.

Prevention, Risk Management and Cost Mitigation.

Not just intervention.

We help clients proactively manage their travel risks, utilising both travel and claims data, and provide them with the best combined solution.

No increase in number and cost of evacuation despite an increase in trips to moderate, high or extreme risk locations.

53%

in-patient cases decreased by

13%²

average cost of out-patient cases decreased by

33%³

Despite a trend of pronounced medical expenses inflation globally, the average cost of joint Chubb and International SOS clients decreased by

42%⁴

1. A study produced combining Chubb claims experience data and International SOS case information

2. For joint clients in the period 2014 to 2017

3. For joint clients in the period 2013 to 2017

4. For health and medical related cases in the period 2013 to 2017
