KNOWLEDGE IS POWER

Identifying and managing risk is the only way to ensure a safe and successful trip for your students and staff, whether they are staying close to home, travelling interstate or heading overseas.

PROMISE THE BEST. DELIVER THE BEST.

One of life's greatest lessons is that things don't always go to plan. How you prepare and the support you have in place will determine the outcome in every situation.

PROTECT YOUR COMMUNITY

Know that your students and staff are safe when they are away from home. Protect your school's reputation with visible, best practice processes.

STAY INFORMED

Prevent an incident before it happens by using our in-country intelligence and best-in-class resources to support your risk assessment process.

INCLUSIVE EDUCATION

When risks are managed appropriately, everyone can participate, which means you can say 'yes', instead of having to say 'no'.

LEAD INNOVATION

Striving for excellence comes with the responsibility to lead, innovate and deliver best practice processes wherever possible. This applies to the education and safety of your students and staff, both in the classroom and beyond.

DEMONSTRATE COMPLIANCE

Risk mitigation is more than policies and procedures; prove to the school community that you are committed to delivering on your obligation to protect your students and staff.

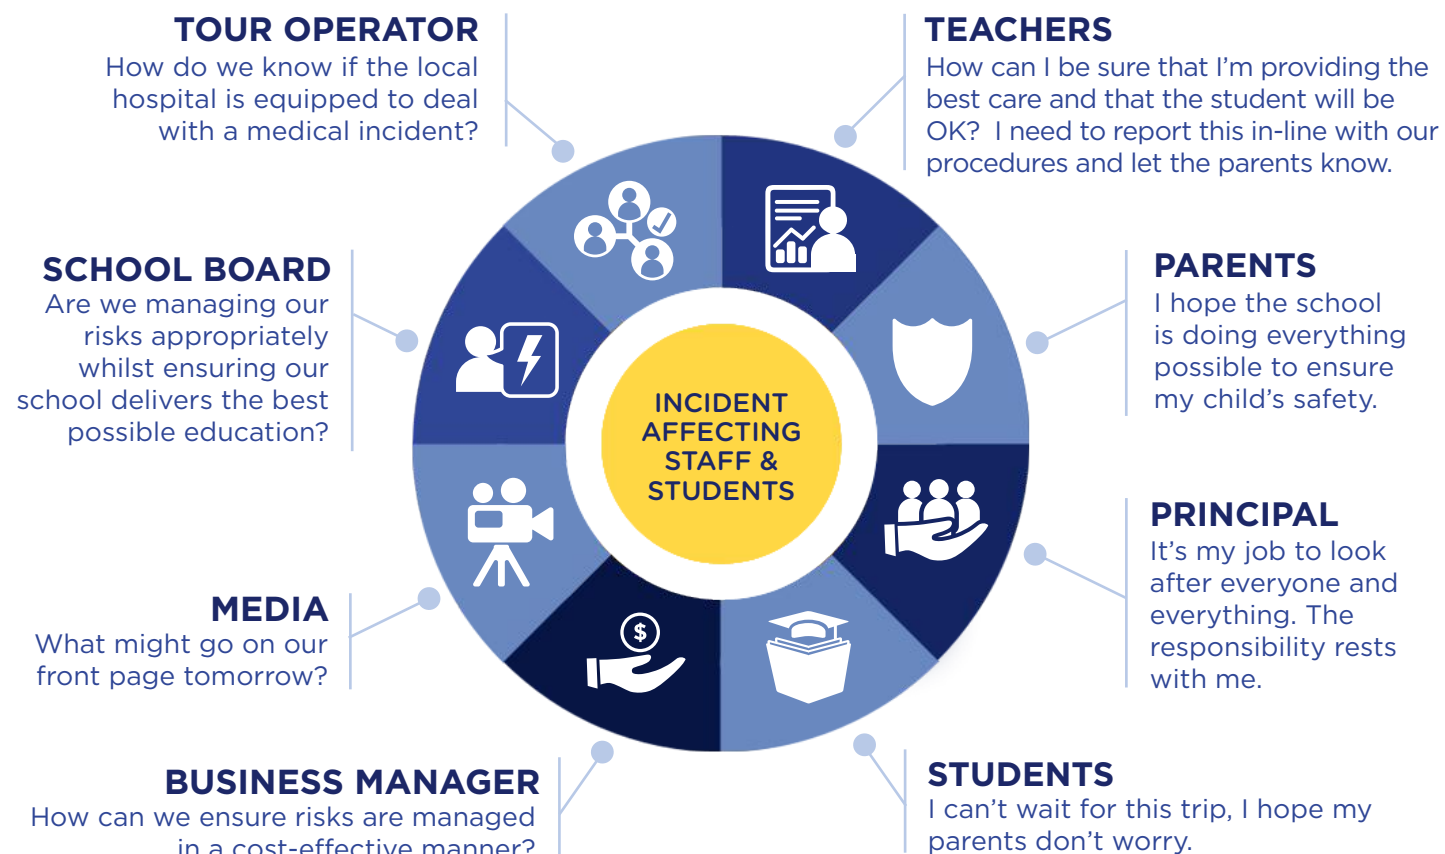

BE SUPPORTED

Trust that your community is in the safe hands of the industry leader, with access to vetted, up-to-date information, and the support of our analysts, doctors, and security specialists wherever and whenever you need it.

PREVENTION PAYS

At a fraction of the cost of an excursion, give the whole school community peace of mind by protecting your school's reputation, and the well-being of your students and staff.

PROMOTE STUDENT AND STAFF WELL-BEING EVERY TIME, EVERYWHERE

Meet your legal and moral obligations with International SOS integrated travel risk management solution to students, parents, staff and the wider community every minute of the day no matter where they are.

When the future of your students is in your hands, **second best is not enough.**
