

# TravelReady

TravelReady is a system that effectively automates compliance with your travel security and medical policies. By ensuring your employees' trip preparations conform with your policies, you cleverly complement your Membership programme and deliver on your duty-of-care.

## Proper Preparation

Have your travellers made the extra preparations for their forthcoming trip, in accordance with your policy? How do you know?

Many organisations find they need to supplement their TravelTracker Pre-trip Advisories to avoid leaving such preparation to chance.

## Return On Prevention

Ensuring all necessary pre-travel precautions are taken, prevents exposing travellers to unnecessary risk and organisations to damaging publicity or even litigation.

TravelReady helps travellers confirm pre-trip preparation and automates the organisation's compliance audit-trail. This results in an improved awareness of essential medical and travel security needs. Considering elements of an international report <sup>1</sup>, a better than twofold return on preventive travel risk mitigation investments can be expected.

## Visible Compliance

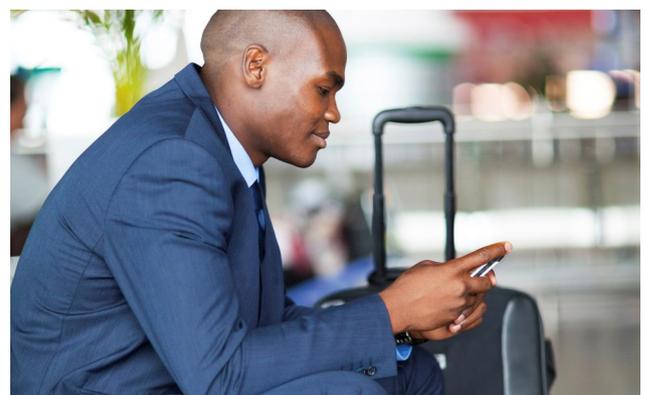

TravelReady monitors the completion of travel preparation, without having to rely on expensive or inconsistent manual methods.

The flexible online forms within TravelReady help ensure travellers are well prepared. TravelReady work-flow mirrors your organisational structure and procedures. Managers can track and report on the stages of process completion.

This provides confidence that elements of preparation have not been overlooked, so travellers are safer and your company demonstrably compliant with duty of care expectations <sup>2</sup> and prevailing legislation.

## Service Components

- Automated forms for travellers to declare compliance with your policies
- Travel approval work-flow for repeatable execution
- Management reporting with levels of compliance clearly visible
- TravelReady Plus adds the ability to verify and validate trips delivering an even more robust audit trail.
