

# PREPARING FOR THE PARIS GAMES

Ensuring the health and security of your participants

## ABOUT THE GAMES

The Olympic and Paralympic Games are the biggest sporting event in the world. Now it's Paris's turn to welcome visitors from all over the world from 26 July to 11 August 2024 and from 28 August to 8 September 2024. This popular, multicultural event raises a number of health and security issues.

## AN ENVIRONMENT WITH RESIDUAL RISKS

The influx of people poses numerous challenges, including the availability of accommodation, security, logistics and the potential impact on the country's health infrastructure.

This also means media exposure for your organisation.

**Although France is considered a low-risk country, foreign visitors to the country may face certain risks:**

- **Social unrest**
- **Security incidents**
- **Accidents**
- **Diseases**
- **Difficulties finding and accessing medical care**
- **Language barriers & cultural differences**

**Mitigating these medical and security risks requires expert support and assistance.**

## OUR SUPPORT BEFORE AND DURING THE GAMES

- Risk assessment for your organisation
- Emergency preparedness plans
- Accommodation security review
- Employee awareness of risks and security measures
- Medical and security assistance planning
- 24/7 health and security assistance for all your participants
