TravelTracker

TravelTracker is an integrated travel tracking service. It complements your Membership by delivering pre-departure travel information, quickly finding and communicating with mobile workers, as well as delivering essential management reports to keep senior managers informed.

Prevention Better Than Cure

Travel disruptions, infectious diseases and security hotspots affect modern travel. You cannot afford to leave their effects to chance.

Ensure that your mobile workforce is properly prepared for such risks; before and during their trips. Should there be a crisis, make sure it is easy to locate and communicate with them at a moment's notice. Receive critical management reports when you need them to keep senior managers up-to-date.

TravelTracker is the essential risk mitigation tool. Integrated into the world's leading medical, travel security and logistics network it remains the market leading mobile workforce tracking service.

Fast Find

In an emergency, find your mobile workers quickly and easily with a few mouse clicks. Once located, e-mail or text them guidance or just confirm that all is well.

More Than Just Tracking

By e-mailing your mobile workforce with destination information, before and during their trips, TravelTracker helps minimise travel risks and reduce disruption to their lives and your business.

Built-in management reports complement search capabilities, by warning of potential issues, such as too many executives on one flight. They also provide that crucial audit trail in the unlikely case that something goes wrong.

Using TravelTracker means that in an emergency you can respond effectively; sometimes even before your workers know they need assistance.

TravelTracker with Membership is the only combination that covers you and your mobile workforce every step of the way.

TravelTracker Services provide:

- Automatic collation of itinerary data for fast, reliable identification of worker whereabouts
- Delivery of Pre-trip Advisories and travel updates to ensure travellers are properly prepared
- Essential management reports to provide an audit trail supporting duty-of-care
- Text and map based searches to find mobile workers quickly when needed
- Management reports that support compliance and operational efficiency
- Ability to add two-way text, e-mail or text-to-speech to confirm safety in an emergency.
