

## COVID-19 RESPONSE

Molecular testing at  
the speed of life

The onboard testing program from **SENTIO** Protect powered by the cue health genetic monitoring platform, is a complete solution for Superyachts. With no compromise in performance or accuracy it uses the latest molecular diagnostic technology to deliver reliable results in under 20 minutes and issues certificates for Port Authority MDH and pre-departure international travel.

# ONBOARD TESTING

Molecular NAAT tests, commonly known as PCR are the gold standard for identifying Covid-19 to keep a safe environment onboard and for pre-departure travel. So imagine a world where you no longer had to leave the vessel to get tested and wait days for your result. Imagine if you had a laboratory in the palm of your hand that provided high accuracy, in real-time, with a simple sample collection process and no complicated testing procedures, seamlessly linked to a mobile app.

Welcome to the world of cue...

- Certificate issued for Port authority MDH (Maritime Declaration of Health and international pre-departure travel).
- Highly accurate molecular NAAT test
- Real-time result in under 20 mins.
- Simple, non-invasive lower nasal swab.
- Plug and play usability.
- Gold standard accuracy, reported 99% Sensitivity, 98% Specificity.
- Supplied with preconfigured apple ipad mini, seamlessly linked to cue health app.
- Regulatory approval: U.S. FDA EUA, Health Canada, EU CE IVD Directive, CDSCO India.
- Used by U.S. government for public health.
- Part of the cue genetic testing range: further test capabilities under development.

Both Cue's COVID-19 Test and laboratory tests commonly known as PCR are molecular nucleic acid amplification tests (NAAT) that detect the genetic material of the SARS-CoV-2 virus.

99% | 98%  
Sensitivity | Specificity

Cue's fast, accurate, lab-quality, molecular testing changes how people, organizations, and communities protect human health—where and when it's needed the most.

## Welcome to the vanguard of maritime health and safety for COVID-19 and beyond

Working in partnership to solve complex occupational health challenges for the Yachting community, using advanced technologies.
