SITE MONITOR

INTERNATIONAL SOS

Empower management's responsiveness to emerging and active threats

Site Monitor serves as an indispensable tool for your global mobility, crisis management, business continuity, safety, medical, and travel security management teams. It empowers your managers by providing site-specific monitoring, alerting, and response capabilities to health and security threats.

Key Features:
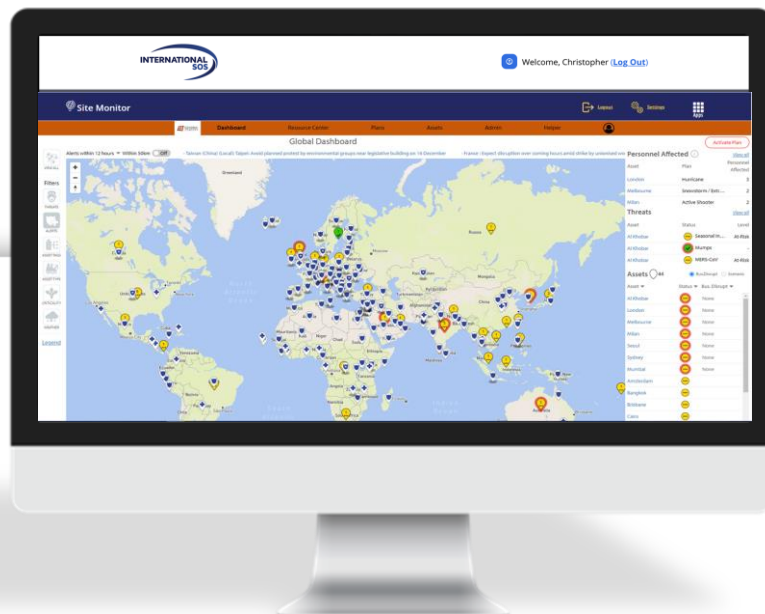

Comprehensive Monitoring:

- Real-time monitoring of threats and alerts.
- Assessment of risks through overlaying medical and security alerts, along with global threat analysis.
- Customisable email alerts based on defined location proximities.
- Pre-scripted playbooks for various threat scenarios.
- Task lists facilitating efficient management and response.
- Access to over 500 customisable communications for incident response.
- Resource download and customisation to align with organisational standards.
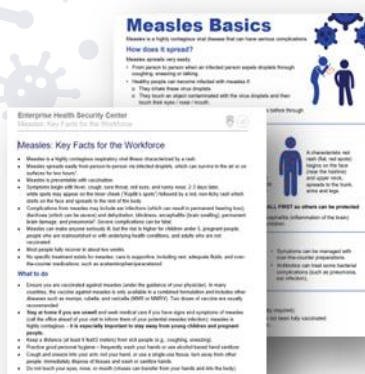

Immediate Response:

- Access to a robust inventory of tactical planning and mitigation content.
- Expert-led guidance for efficient response.
- Customisable communications tailored to specific sites or locations.
- Availability of site/location-specific resources.
- Predefined procedures and task lists for active incident responses.
- Playbooks encompassing multiple scenarios and pre-scripted best practices.

Reporting:

- Rapid reporting on organisational actions during threats or incidents.
- Minute-by-minute reports detailing actions taken from incident alert to resolution.
- Exportable reports in Excel format, editable and customisable.
- Unlimited access and download capabilities for ongoing reporting and updates.

2,200+ Documents & Resources

WORLDWIDE REACH. HUMAN TOUCH.

# MONITOR & RESPOND TO GLOBAL THREATS IMMEDIATELY

INTERNATIONAL SOS

Robust inventory of tactical planning and mitigation content, available to utilise at any time.

"We were able to brand and edit the material, which was hugely beneficial since we have strict guidelines on branding and style. The information included both advice for leadership as well as the general employee population. We even were able to get short, direct infographics to post on internal websites.

It saved us critical amounts of time and energy because we had such immediate access, and it was integral to our successful crisis response." – **Global technology firm, during recent site based measles cases.**

Designed to meet the needs and obligations of security, crisis management, business continuity, and health departments, Site Monitor provides a single dashboard view to monitor all global assets and locations effectively. It enables efficient response with expert-led guidance and facilitates quick reporting on organisational actions, ensuring proactive management of threats and incidents.

Singular Dashboard View
